

The Name Game

Rangers like Solomo have so much knowledge on the Lebialem Highlands that they can 'read' the rainforest. If you were trekking with a ranger, they may not always use the same names for the Lebialem Life animals that we have learnt.

CHALLENGE: See if you can use the clues to work out which animal the rangers are referring to. Either tick them off as you go or use a pencil to draw a line from the clue to the correct animal. (This is a double page activity)

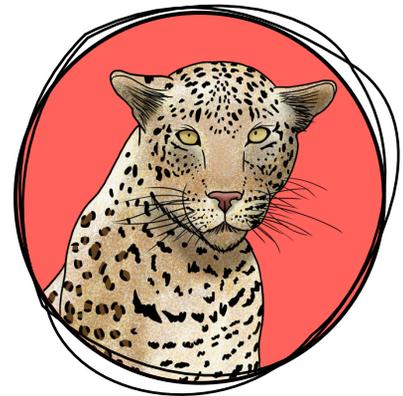

This animal will never forget. Big ears and a long trunk. Got it yet?

Gheshe

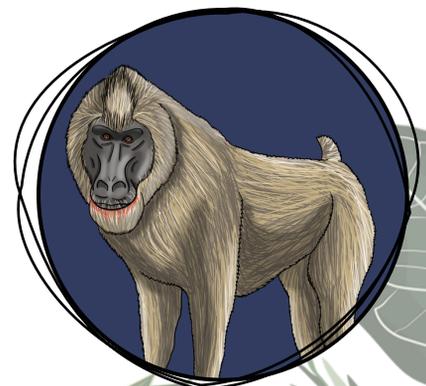

It's all in the detail... this monkey has a very long tail.

Nkah

The pattern on their fur makes them hard to spot. It depends on your vision if you can see them or not.

Ngwii

Think carefully about the countries you see, this is the Nigerian-Cameroon...

Boukop/Boa

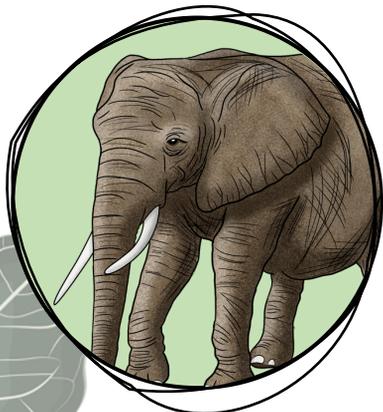

During Pack 1 you learnt how to track these! Take your mind back and use your expertise.

Njimagem

In Rainforest Yoga you had to pose and grin. Can you do it still? Can you grin like a ...?

Shambo

You'll see flashes of red, green and blue. That is your clue.

Nguh
